

# AccelaStudy AI Goes Multi-Platform: Native Apps for iOS, iPadOS, macOS, Windows, and Linux Launch June 1

The AI-Native Adaptive Learning Engine That Launched on the Web on May 11 Is Now Available on Every Device — With Real-Time Cross-Device Sync of Knowledge State

**FOR IMMEDIATE RELEASE Monday, June 1, 2026 — 6:00 ET**

DALLAS-FORT WORTH, June 1, 2026 — Renkara Media Group, Inc. today released native applications for AccelaStudy AI on iOS, iPadOS, macOS, Windows, and Linux. The native apps follow the platform’s web launch on Monday, May 11, 2026, and bring the same adaptive learning engine — covering 929 certification exams and standardized tests, powered by 1,400,000+ AI-synthesized questions — to every device a learner uses.

Every native app shares a single account with the web and synchronizes the user’s full knowledge state — every answer, every confidence signal, every knowledge model — across devices in real time.

## What Launches Today

Platform	Distribution	Notes
<b>iOS</b> (iPhone)	Apple App Store	Native Swift, full engine parity, sub-2ms knowledge updates
<b>iPadOS</b> (iPad)	Apple App Store	Split-view multitasking, Apple Pencil for handwriting on math activities
<b>macOS</b>	<a href="https://accelastudy.ai/download">accelastudy.ai/download</a>	Signed + Apple notarized DMG; Apple Silicon + Intel universal binary
<b>Windows</b>	<a href="https://accelastudy.ai/download">accelastudy.ai/download</a>	Code-signed NSIS installer; Windows 10 + 11
<b>Linux</b>	<a href="https://accelastudy.ai/download">accelastudy.ai/download</a>	AppImage + .deb (Ubuntu, Fedora, Debian-derivatives)

All five native apps run the same AVIAN engine that powers the web. There is no “lite” version, no feature subset, no platform-specific limitation.

## The Cross-Device Sync Story

The hardest engineering problem in a multi-platform launch is not building five apps; it is making them feel like one app. AccelaStudy’s solution is direct: every learner’s knowledge state is a single

source of truth held server-side. Every device — web, iPhone, iPad, Mac, Windows, Linux — reads from and writes to that model. A question answered on iPhone updates the model in under 2 milliseconds; the next time you open the Mac app the knowledge map reflects that update before the window finishes drawing.

In practical terms:

- Start a study session on the train; finish it on your laptop. State is identical.
- Answer a question on iPad in split-view; the readiness gauge on your iPhone updates while it sits on the kitchen counter.
- Take a full exam simulator session on the Mac; the knowledge model you carry into your next session on the iPad already incorporates everything the engine learned.

## Founder Quote

“On May 11 we said the web was the first platform to ship the engine cleanly,” said Charles Sieg, Founder & CEO, Renkara Media Group, Inc. of Renkara Media Group. “Today the rest catches up. iOS, iPad, Mac, Windows, Linux — same engine, same account, same knowledge model. Two weeks ago somebody told me they wanted to study on the train. Today they can. That’s the entire story.”

## Native App Highlights

### iOS / iPadOS

- Native Swift, built for iOS 17+ and iPadOS 17+
- Background sync — updated knowledge state available before app open
- Apple Pencil support on iPad for handwriting on math + diagram activities
- iPad split-view: lesson on left, knowledge map on right
- Picture-in-picture exam simulator timer
- Notification scheduling — daily study nudges based on the engine’s spaced-repetition curve
- iOS Shortcuts integration — “Hey Siri, start a CompTIA Security+ study session”
- Privacy: zero third-party SDKs, zero analytics, zero ad networks

### macOS

- Apple Silicon + Intel universal binary
- Signed and notarized — no Gatekeeper warnings
- Native menu bar with full study-session controls
- Multi-window support (knowledge map in one window, exam in another)
- macOS Spotlight integration — search across all 854 certs from anywhere
- Continuity Camera — capture handwritten work from iPhone directly into a math activity

### Windows

- Code-signed NSIS installer with EV certificate (no SmartScreen warnings)
- Windows 10 and Windows 11 supported
- Native Windows notifications
- Jump-list integration for recent study sessions

## Linux

- AppImage (universal) and .deb (Ubuntu, Debian)
- GTK + Electron native window controls
- Tested on Ubuntu 22.04 LTS, Ubuntu 24.04 LTS, Fedora 40, and Pop!\_OS

## Pricing

Identical across all platforms. Same six product lines. Same monthly + annual options. A single subscription works on every device. See [accelastudy.ai/pricing](https://accelastudy.ai/pricing).

## Patent Portfolio

The AVIAN engine that powers every AccelaStudy platform is protected by 29 patent filings covering 637 claims across adaptive learning, knowledge synthesis, assessment generation, federated learning, cross-device knowledge synchronization, and privacy-preserving techniques.

*Patent applications are pending.*

## Availability

- **iOS / iPadOS:** Apple App Store, search “AccelaStudy AI” — live now
- **macOS / Windows / Linux:** [accelastudy.ai/download](https://accelastudy.ai/download) — live now
- **Web:** [accelastudy.ai](https://accelastudy.ai) — live (since May 11)
- **Free demo:** [accelastudy.ai](https://accelastudy.ai) — no account required

## Product Hunt Launch — Tuesday, May 26

AccelaStudy AI launches on Product Hunt at 12:01 AM PT on Tuesday, May 26. Find the listing at [producthunt.com/posts/accelastudy-ai](https://producthunt.com/posts/accelastudy-ai) or follow @AccelaStudy for the link.

## About Renkara Media Group, Inc.

Renkara Media Group, Inc., founded in 2008, builds AI-powered learning technology. Its flagship product, AccelaStudy AI, is an adaptive learning platform that maintains real-time knowledge models of every learner and uses them to eliminate wasted study time across 929 certification exams and standardized tests. The AVIAN engine powering AccelaStudy is protected by 29 patent filings covering 637 claims. Renkara is bootstrapped and headquartered in Keller, Texas. Learn more at [accelastudy.ai](https://accelastudy.ai).
